

Phạm Hải Phước, React Native Developer

Ho Chi Minh City, Vietnam, +84906634091

phamhaiphuoc15@gmail.com, [Linkedin](#)

PROFILE

Passionate Software Engineer with 4+ years experience in React Native development. Proficient with third-party libraries including Push Notifications (FCM), Redux, Redux Saga, and Axios. Over 1 year of experience leading mobile development teams and mentoring junior developers. Experienced in using AI to improve development productivity and code quality.

EMPLOYMENT HISTORY

Sep 2025 — Present: Senior Software Engineer, CMC Global (Onsite ACB Bank)

Worked at CMC Global with onsite assignment at ACB Bank, contributing to multiple banking modules including **Visa Collection**, **Mutual Funds (Fund Certificates)**, and **New Core eKYC**.

- Served as a software engineer responsible for developing and maintaining mobile applications using **React Native CLI**.
- Utilized **MobX-State-Tree** and **Redux** for state management to ensure scalable and maintainable application architecture.
- Integrated and connected with **external SDKs** to support banking features and third-party services.

Sep 2025 — Feb 2026: Freelancer Senior Software Engineer (React Native Expo)

Worked as a freelancer software engineer, responsible for developing a secure chat application inspired by Vietnam's Zalo platform.

- Served as a software engineer responsible for developing and maintaining mobile applications using **React Native CLI**.
- Using Zustand for state management to ensure scalable and maintainable application architecture.

May 2024 — Sep 2025: Middle/Senior Software Engineer, Super Nova Technologies

Serves as a Senior Software Engineer, leading a team focused on developing a chat application similar to Telegram.

- Led a team of four in the development of a chat application modeled after Telegram.
- Mentored three team members, fostering their technical skills and professional growth.
- Advanced role to senior level through effective project management and technical contribution.

Sep 2022 — May 2024: Middle React Native Developer, Philodox

Focused on developing applications using React Native while gaining experience with Next.js.

- Developed mobile applications utilizing React Native, enhancing functionality and performance.
- Acquired skills in Next.js for server-side rendering and optimized web application development.
- Participated in the full development lifecycle, ensuring quality and timely delivery of projects.

Mar 2021 — Aug 2022: Fresher/Junior React Native Developer, Vinova Ho Chi Minh

Contributed to the development of two React Native applications, focusing on feature implementation and bug resolution.

- Developed the Danz People and Rabbit applications using React Native.
- Implemented new features for both products to enhance functionality.
- Resolved bugs and improved application performance through regular updates.
- Collaborated with the team to maintain code quality and adhere to best practices.

PROJECTS

ACB ONE (*React Native*)

Worked as an outsourcing developer, supporting the internal ACB team in enhancing and extending features for the ACB ONE mobile banking application.

Responsibilities:

- Developed assigned modules and new features following existing application architecture and coding standards.
- Modified and optimized core components to ensure compatibility and reusability across newly developed modules.

- Integrated third-party SDKs provided by external partners to support additional banking functionalities.
- Collaborated closely with the internal development team to implement new features, fix issues, and ensure smooth integration.

OKI Chat App (*React Native*) <https://apps.apple.com/us/app/oki-chat-platform/id6758304434>

A secure communication application supporting real-time messaging and voice calls, featuring end-to-end encryption to ensure message confidentiality and prevent conversation interception.

Responsibilities:

- Using React Native Expo (54) for project
- Collab with BE team to connect API request
- Integrated third-party APIs and services including Firebase, Push notification APNs, Realtime socket, Livekit

Sync Super App (*React Native*) <https://apps.apple.com/vn/app/sync-chat-app/id6747809379>

A communication application that supports real-time messaging and voice calling between users.

Responsibilities:

- Write code base React Native CLI (v0.79) for project
- Collab with BE team to connect API request
- Integrated third-party APIs and services including Firebase, Push notification APNs, Realtime socket, Livekit, Alchemy
- Integrated CI/CD for project including Fastlane
- Leading team with 3 members
- Planning and discuss with Product team for new feature and backlogs

Danz People App, (*React Native*) <https://apple.co/45uEzfq>

A trusted online community where verified users anonymously share content.

Responsibilities:

- Implemented user authentication and data synchronization with Firebase
- Created responsive UI components following Styled Component
- Fixed bugs and improved app performance by optimizing render cycles
- Optimize re-render component and use HOC
- Participated in code reviews and testing for quality assurance

Doxa Website (*Nextjs 14*)

A website for philosophical discussions, where people can ask questions about philosophy. This website is inspired by popular discussion forums today like Quora.

Responsibilities:

- Write code base for project
- Collab with BE team to connect API request
- Integrated third-party APIs and services including payment gateways, social media logins
- Leading team with 4 members
- Planning and discuss with Product team for new feature and backlogs

Doxa App (*React Native*)

App for philosophical discussions, where people can ask questions about philosophy.

Responsibilities:

- Write code base React Native for project
- Collab with BE team to connect API request
- Integrated third-party APIs and services including Firebase, Push notification APNs
- Integrated CI/CD for project including Fastlane
- Leading team with 4 members
- Planning and discuss with Product team for new feature and backlogs

EDUCATION

Jan 2018 — Jan 2022: Bachelor's degree in Information Technology, UEF - Ho Chi Minh City University of Economics
